Product description:

Birch forest motif in a charcoal-sketched character. The delicate and majestic trees in black on a calm concrete background in shades of grey will decorate many interiors. The pattern will suit bedrooms, living rooms, kitchens, bathrooms or commercial spaces such as restaurants, shops, hotels or medical practices. The murals are created individually for each customer, which is why the price of an order is determined after determining the size and choosing the surface you are interested in. The customer himself defines the frame he is interested in. Please contact us for an offer or A5 sample.
