Product description:

The original wallpaper from the English company 1838 Wallcoverings is a fine geometric pattern in turquoise and graphite colours. The motif is reminiscent of small windows - the orange shaded background shines through the flocked texture. Great for both the living room and bedroom. The Willow collection is a collection of diverse and original wallpapers of excellent quality and rich colours. Here, geometry, floral motifs and abstraction are combined with gloss and a clearly perceptible texture. The strengths of this collection are flocked wallpapers combined with modern patterns and strong colours. These coverings will appeal to both design enthusiasts and interior designers and give them the opportunity to express their creativity. There is something for everyone. Fleece wallpaper, washable.
