Manufacturer: 1838 Wallcoverings

Product attributes:**Product description:**

The wallpaper by the English company 1838 Wallcoverings imitates a cut mineral. With its blue thorns and white veining, it resembles one of the agate varieties. The cladding looks beautiful on its own but can also be coordinated with other wallpapers from the catalogue. The Willow collection is a collection of diverse and original wallpapers of excellent quality and in rich colours. Geometry, floral motifs and abstraction are combined here with gloss and a clearly perceptible texture. The strengths of this collection are flocked wallpapers combined with modern patterns and strong colours. These coverings will appeal to both design enthusiasts and interior designers and give them the opportunity to express their creativity. There is something for everyone. Fleece wallpaper, washable.
