Product features:

Manufacturer: Versace

Collection: Versace IV

Product attributes:

Product description:

The wallpaper with a motif of flowers inscribed in a large frame perfectly reflects the aesthetic of the great creator-combining baroque with modernity. The silver colour is cool and offers great design possibilities. The Versace IV collection is rich in colour, gloss, tactile texture - everything that is associated with a luxurious and highly recognisable brand. Floral motifs flow seamlessly into geometrics and ornaments, and all wallpapers are united by Ganni's characteristic Versace sign - the jellyfish. The attention to detail and the excellent quality of the vinyl from which the wallpapers are made is a perfect combination. Vinyl wallpaper on fleece. Washable, impact resistant, easy to install.
