Product attributes:**Product description:**

The delicate wallpaper in a trendy salmon colour from the Manille collection is deceptively reminiscent of a thick fabric. It is very striking in its simplicity and will work perfectly in the most diverse interiors. The Manille collection is a collection of wall coverings from the French company Casamance, which refers to textiles that have been made in the Philippines for centuries. The motifs are simple, with a predominance of earthy colours and distinctive textures. The whole is very harmonious and gives the impression of cosy warmth. Vinyl wallpaper on a fleece backing. Washable.
