Product description:

The natural black wallpaper from the Manille collection is deceptively reminiscent of a thick braid. It is very striking in its simplicity and the dark colour will be a perfect addition to bright spaces. The Manille collection is a collection of wall coverings by the French company Casamance which refers to fabrics made for centuries in the Philippines. The motifs are simple, with earthy colours and a distinctive texture predominating. The whole is very harmonious and gives the impression of cosy warmth. Vinyl wallpaper on a fleece backing. Washable.
