## **Product description:**

The natural, wallpaper with a motif of large, blue-green leaves is original in its simplicity. The structure of the fabric adds warmth and cosiness to the cladding and the colours bring a breath of freshness to the interiors. The Manille collection is a collection of wall coverings from the French company Casamance, which refers to fabrics that have been made in the Philippines for centuries. The motifs are simple, with earthy colours and a distinctive texture predominating. The whole is very harmonious and gives the impression of cosy warmth. Vinyl wallpaper on a fleece backing. Washable.
