**Product attributes:****Product description:**

The wallpaper from the Icons series from the Belgian manufacturer Arte is based on panels imitating lizard skin. The wallpaper's structure is perceptible to the touch, thanks to which we have a visible three-dimensional effect. The whole will shimmer delicately in the light and will introduce radiance and effective contrast to the interior. In addition to geometric patterns, the entire catalogue features floral patterns and three-dimensional motifs on sponge, which in addition to their impressive texture have a sound-absorbing effect. The catalogue also contains natural patterns of canvas and rattan. The combination of motifs inspired by nature and geometric shapes will fit perfectly into any interior.
