Product description:

A wallpaper depicting a garden full of flowers, a delicate and poetic proposal. The wallpaper in flowers and leaves is reminiscent of a field meadow or a herbarium, a great solution for refreshing interiors and introducing a touch of nature to them. It is a charming design that will bring nature into interiors, and will fit perfectly into botanical arrangements, as well as those in a Scandinavian or boho climate. It will bring a positive aura, harmony and peace to the room. Vinyl wallpaper, washable on a fiseline backing.
