Product codes:

Reference: PERP86477202

EAN13: -

UPC: -

Product features:

Manufacturer: Casadeco

Collection: PERCEPTION

Product attributes:**Product description:**

A modern and geometric wallpaper with a popular motif of a cube, the so-called cube in 3D form. The pattern is covered with a tactile texture, thanks to which the wallpaper acquires a real three-dimensional character. It will look beautiful on the main wall typically decorative, or as a background to furniture and accessories. The variety of colours of the pattern will make everyone find something for themselves. The wallpaper is characterised by high resistance to washing and mechanical damage. The vinyl coating protects the wallpaper from damage. Thanks to this, the wallpaper can be successfully used in the kitchen, hallway or bathroom, where the danger of damage is the greatest. Projekt comes from the catalogue of Perception, a French brand Casadeco, for which quality is always in the first place. Wallpaper on a fleece backing during installation.
