Product attributes:**Product description:**

The wallpaper by the French brand Casamance from the Karabane collection in a tegzotic atmosphere refers directly to the island atmosphere native to the African island in Senegal. The motif is made on high quality vinyl suitable for demanding, utilitarian interiors. The pattern gives an imitation of a fabric ideal for creating a cosy atmosphere in the interior. Thanks to its resistance to sunlight and washability, it will look great for many years on an accent wall in the living room, an interesting element in the kitchen or hallway. The damage-resistant vinyl wallpaper has a high abrasion resistance.
