Product description:

The beautiful cladding from the Botanical Dreams collection depicts large, green leaves on a white background. They give the impression of being moved by a gentle sea breeze. This wallpaper brings the power of good energy and lightness into our interiors. The Botanical Dreams cladding collection is another example of the collaboration between York and designer Candice Olson. In it, Candice returns to her roots and shows a romantic nature. There is clear inspiration from gardens, parks. There are a lot of floral motifs and simple geometrics in blues, greys and beige and a touch of glitter with the use of quartz sand adds a feminine touch. Beautiful design, excellent quality, easy to install - this collection is hard to resist. Washable wallpaper on a fleece backing. Easy to dismantle.
